

ESTABLISHED TANKS

*Our live products provide the **biodiversity** your mature tank needs!*

TBS live rock and live sand can easily be added to established tanks. Because our live rock is shipped submerged, there is no to little die off, this means no mini cycle. Our live sand is so alive, mix it with existing sand for added beneficial life forms.

Order **Live Rock & Live Sand** today & improve tank health naturally.

Adding to an Existing Aquarium:

Whether you are seeding an established system with new microorganisms, overcoming dry rock regret, replenishing sand depth, or just rearranging your aquascape; TBS products are easy to introduce to an established system.

Initial preparations-

- When ordering consider the benefits **BOTH** live rock and live sand offer
- **Place your order for Live Rock and Live Sand**
- We will contact you to arrange shipping

TBS Order Arrives-

- **Prepare** for unboxing (towels, scissors, buckets, etc.)
- Pick up at the airport cargo office or await a UPS Treasure Chest at your door
- Turn off water movement
- Open boxes carefully and follow the specific directions included with the order

Adding Live Sand:

- **Perishable product** add to functioning aquarium upon arrival
- **Mix** with existing sand in a small section; along the sides, front or back
- **OR siphon** out a portion of old sand and dispose; replace with TBS sand
- **Bare bottom?** Cover that and see how happy your fish will be!

Adding Live Rock:

- **Perishable product** add to functioning aquarium upon arrival
- **Place** directly into the display
- **Place** in sump, refugium, filter chamber or overflow
- **Add** to a refugium for macro and pods

Adding Live Critters:

- **Acclimate** per your preference to tank parameters
- Release critters, not shipping water

And so on... If you don't already:

- connect with other hobbyist, join a forum!
- Start a tank maintenance schedule: same day, same time
- Start a tank maintenance routine: same gallons out/in

Absolutely Do Not:

- cure
- dip
- rinse
- neglect

Our goal is to provide your system with healthy micro and macro-organisms that only the ocean can provide. We do our best to preserve life in our sand and rock by treating it with the utmost care from the ocean bottom to your aquarium. Our desire is for your success in maintaining a marine environment.

Please reach out with ANY questions and will do our best to help.
